LAYING DOWN THE FOUNDATIONS OF TOMORROW

ABOUT US

Charvet Nigeria Limited is a civil engineering and construction company, established in 1996 to provide high quality, innovative civil engineering and building construction works, including all associated mechanical and electrical installations.

Over the years, we have acquired extensive diverse experience in the civil engineering and construction industry in Nigeria. Our knowledge of local conditions and working methods allow us the flexibility to execute any project nationwide.

Our senior management team has over 35 years of international and local civil engineering and building construction management experience, supported by a highly committed team of professionals that provide the necessary leadership structure for the company. Another key to our policy is to invest in modern construction plans and equipment with adherence to appropriate levels of maintenance at all times, to ensure the standard of delivery that is expected by our clients.

We are fully committed to fulfilling our client's aspirations regarding quality, time and budgets, by ensuring the competency of our personnel "fits for the purpose" standards of all our plant/equipment and the adequate deployment of resources and organized logistics.

In addition we utilize details planning and an open communication structure to ensure all parties to any project we undertake, understand project requirements well ahead of schedule, enabling them to be proactive with preventive and dynamic solutions.

OUR VISION

Our vision is to be the civil engineering and construction company of first choice for clients in Nigeria by:

Building lasting relationships with our clients and employees based on performance, trust, and confidence.

Providing services of the highest professional standard and value to our clients delivered by a team of experienced professionals and technicians committed to excellence.

Maintaining a team environment and working in a cooperative manner with clients, design and construction professionals.

Providing pro-active after contract completion service.

OUR MISSION

Our mission is to deliver the highest level of quality engineering and construction service at fair market competitive prices.

We ensure customer satisfaction in all areas including timeliness, attention to details, and our service-minded attitude.

We maintain the highest levels of professionalism, integrity, honesty, and fairness in our relationships with our clients, employees, associates, subcontractors and suppliers.

HEALTHY AND SAFETY & ENVIRONMENTAL POLICY

We consider that health, safety and respect for the environment and safeguarding of assets are essential to the efficient operation of our activities and to our employees, contractors and other stakeholders. We are committed to having an HSE management system in force and in recognition of the fact that safe operations depend not only on technically good plants and equipment, but on competent personnel and an active HSE culture.

It is policy to:

Maintain safety in construction works and provide safe facilities and equipment that are properly designed, engineered, constructed, maintained and operated. Comply with all legal requirements nationally, international standards and Charvet Nigeria limited policies.

Monitor the health of all employees on a regular basis to ensure that they have the physical capacity to perform their task. Work with our contractor and suppliers to help them commit to our HSE standards. Maintain adequate emergency response procedures and resources to minimize the impact of incidents and accidental cases for effectiveness. Ensure that employees, contractors and stakeholders are constantly aware of, trained on our HSE requirements and abide by them.

Conduct internal controls and periodic review, backed by independent audits to verify that adequate measures have been taken and identify possible area of improvement. Strive to reduce the environmental impact of all our operations, to identify and minimize risks and prepare to take relevant actions should an incident occur.

Pursue continuous improvement in the measures taken to protect the health, safety and environment of those who may be affected by our construction works. Report and analyze all the incidents and anomalies in order to improve procedures, behavior of operators and equipment's in the running of our operations.

Setup and monitor measurable HSE performance indicators that are part of our business plan and budget, analyze and report part of the quarterly management scoreboard, recognize and motivate those who contribute to improve HSE performance. With the continuous and permanent commitment of everyone, we will achieve these objectives. The management will regularly ascertain that these objectives are met.

LOCAL CONTENT POLICY

Charvet Group limited offers client a full service approach to their property development and construction requirements. Our stakeholders include clients, business partners, authorities and the communities where we work. Employees and sub-contractors.

Charvet Group limited is committed to improve not only the built structure it develops, but also ensures there are long lasting benefits for the surrounding communities in which they are constructed.

Charvet is committed not only working in local communities, but also being an active participant in them, through the support and utilization of local services, suppliers and trades people. Nationwide, each of the Charvet business units actively seek opportunities to use local materials where appropriate and possible.

The engagement with businesses and service providers in the region of work enables Charvet to further the benefits invested in each projects well beyond that of just the provision of a new facility.

Charvet recognizes and seek to further support the financial multiplier impact of utilizing local companies and organizations.

This does not only bring about greater financial spin offs for the local companies and communities involved, but also expands that local knowledge available to a project team and assists in minimizing the overall ongoing operational costs of a project.

More so, in regional areas in particular, this translates into appropriate skilled and experienced personnel being available to undertake maintenance and ongoing facility support. This further expands the scope of the project experience for local contractor and their ability to further develop, providing even more local benefits and greater local opportunities.

As a construction management company, Charvet is committed to the successful engagement of local people, suppliers and manufacturers to work in the local areas, while emphasizing the same attention to detail no matter where the project is located.
